

CERTIFICATE OF PARTICIPATION

DARANPHOP RUENGSIKIPHAKAKUN

has participated in

Digital Exploration Robots in the Warehouse

During this course, you teamed up with Lennie, the warehouse robot, to discover how automation can transform the process of fulfilling online orders. Using Python, you learned how to use programming control structures such as sequence and iteration in robotic control. By applying these skills, you were able to guide Lennie around the warehouse floor and facilitate smoother daily operations.
